

# ZIEMEK/PATTERSON DIGITAL SCANNER DEMO EVENT

Digital Impression Scanners are quickly becoming the standard of care. It has been estimated that by 2020 half of all dentists will own at least one Digital Impression Scanner, but choosing the system that is the best fit can seem like a confusing process. Join Ziemek Laboratories and Patterson Dental for a very unique opportunity to learn all the features, functionality and workflow of the four most popular Digital Scanners on the market today; **3Shape Trios, iTero Element, 3M True Definition, and the Cerec by Denstply/Sirona.**

All systems discussed will be on-site, attendees will receive hands-on demonstrations, and be able to chat with experts about each system one on one in a low pressure environment. Lab-clinic workflow will be outlined and attendees can see the laboratory equipment that produces digital restorations and models up close. We look forward to seeing you for an amazing evening of continuing education and fun with new technology!

## INSTRUCTOR

Dave Anable is a 25 year veteran of the Pacific Northwest dental community, Dave has been involved with several innovations in both the dental office and laboratory including developing the Provide Abutment at Biomet/3i, helping launch the CeraMill 5 axis mill in the U.S. with Amman Gurrbach, launched the Weiland 5 axis mill specifically designed to mill e.max in a laboratory setting with Ivoclar, and more. Fun Fact: Dave is the first patient to have an implant case scanned intraorally in the US and received the first Encode custom abutment! Dave is a proponent of digital technology for both the clinic and laboratory and is very passionate about teaching dental professionals all the benefits of the digital workflow.

## Course Objectives

- Learn the features of 4 different Digital Scanners: 3Shape Trios, iTero Element, 3M True Definition, and Cerec
- Receive hands-on demonstrations of each system
- Learn about digital workflow for Fixed, Removable, and Implants
